VOIP ESSENTIAL

## Hosted Business Phone Systems

Introduction

Our business-class Hosted PBX solution uses the flexibility and scalability of Internet communications. With us, your communication is no longer dependent on hardware or location.

In addition, you get a host of communication tools you won't find on any traditional telephone system, at any cost! It's all part of our converged voice and data service, which consolidates your communication network, increases employee productivity, reduces your costs, and basically just makes your life a whole lot simpler.

And with our enterprise-grade Quality of Service (QoS), and managed IP network services, you're assured of the most reliable communication solution available anywhere today.
